

Northstar Financial Services (NFS) - AI Governance & Responsible Use Policy

- **AI-01 (Data Usage):** Generative AI platforms are strictly prohibited from using NFS customer data, employee data, or confidential corporate documents to train, fine-tune, or improve their foundational or proprietary models.
- **AI-02 (Guardrails):** AI systems must implement persistent input/output guardrails to prevent the generation of biased, toxic, or legally non-compliant content.
- **AI-03 (Transparency):** Vendors must provide documentation detailing model provenance and the primary datasets used for initial model training.
