

Northstar Financial Services (NFS) - Information Security Policy

- **SEC-01 (Certifications):** Any third-party vendor hosting or processing NFS data must maintain a valid, current SOC2 Type II certification. SOC2 Type I is insufficient for production data.
- **SEC-02 (Encryption):** All data must be encrypted in transit using TLS 1.3 and at rest using AES-256.
- **SEC-03 (Vulnerability Management):** Vendors processing Confidential or Restricted data must undergo independent, third-party penetration testing at least annually (every 12 months).
